**Subject:** RE: Water Quality Monitoring Council: PFAS in Groundwater and Surface Waters: Why Should We Care? By Usha Vedagiri, Ph.D., Principal Risk Assessor, AECOM, Oakland, California

Take what they say with a BIG grain of salt. AECOM (Dana McCue Principal Risk Assessor) recently fronted a petition on behalf of Chemours to get the NC DEQ to relax their GenX in drinking water health value from 140 ng/L to 70,000 ng/L.

Mark

While much attention is paid to the drinking water limits for PFOS and PFOA, there is much more to the PFAS story. This presentation will provide an overview of the current understanding of their sources, behavior and distribution in groundwater, surface water and other media, their potential health effects, regulatory screening levels, and also explain the reasons for variations in screening levels in current state-level guidance for PFAS.

The recordings of all webinars can be accessed at:

**Ex. 6 Personal Privacy (PP)**
